

Marc's commitment to our customers, employees, and our communities has never been stronger!

As we continue to monitor and follow the expert guidance provided by the Centers for Disease Controls (CDC) regarding the Coronavirus (COVID-19), our main goal is to continue to keep our employees and customers healthy.

- We have implemented an increased cleaning and sanitizing regimen at all stores.
- We are ordering product from all available resources.
- Our trucks and warehouse facilities are operating 24/7.
- Extra efforts on stocking and product availabilities are in place
- In an effort to serve the most customers, we have implemented limits on certain items.
- We will continue to bring you the freshest product and the national name brands you know and trust!

We do ask any customers who are feeling ill, coughing, sneezing or feverish to refrain from patronizing our stores until you are sure you are well and cleared of any communicable diseases.

We will continue to closely monitor this pandemic on a daily basis and will follow all recommendations for safety as put out by the World Health Organization (WHO), Centers for Disease Control (CDC) and our local and federal governments. We appreciated your patience during this extraordinary time and we will work diligently to be your partner in safety and health.
